Will you be using the techniques yourself?	47	0	100

COMMENTS:

Parents:

I thought it was very informative. Joe is a very inspirational trainer. Very engaging. Very inspiring. Loads of great points to take on board. Gave some food for thought of how I can help even if I don't understand the subject matter. Really simplified techniques. A very helpful and positive impact. Really helped clarify what is required to help my daughter. Helped us to understand what the techniques are and how we can offer our support. Reinforced some existing techniques and expanded my knowledge on recall. Illuminating, extremely engaging and very helpful. Provided lots of techniques that my son and I can use. I discovered that I can use these methods and ideas to help support my son, now and in future. Felt really positive about memory retention techniques and gave us lots of encouragement. I found it very interesting and incredibly useful. Great ideas for revision techniques. I really enjoyed the mind map. Good to learn modern revision methods. I will be using these techniques in work! Informative and very interesting. Really good to be informed that there are a wide variety of revision techniques. Attention grabbing and informative- maintained positive energy despite multiple sessions. Revision can be enjoyable! It was excellent, just long enough, informed us of very good ideas to help our son. Refreshed some very good methods not used for a while. Great to be able to do this session alongside our children, very supportive and enjoyable! Excellent for helping my son to achieve his full potential. Many Thanks! Very impressive! Will be using with my son to revise and for myself in life!
