Level 3 Apprenticeship schemes 2018 – Runcorn

An Atos apprenticeship provides the perfect combination of employment and training; the opportunity to learn and apply skills that matter in the workplace, whilst in paid,

Salary: £14,000 pa

Start dates: July and September 2018

Software Development: Level 3

- Application Management Apprentice

This role will see you providing support for IT applications and solutions, from troubleshooting and system monitoring to incident resolution, in liaison with clients and suppliers. You'll develop and implement fixes and enhancements to existing applications as well as developing and implementing new applications, using a range of tools and technologies.

Infrastructure Technology: Level 3

- Middleware Apprentice

You'll work with an experienced team providing technical support for managed ATM services across our client base. You'll develop highly sought-after skills across a wide range of IT platforms and benefit from working in a large, dynamic organisation. You'll gain expertise in managing Middleware applications – performing health checks, patching and ensuring lifecycle compliance, as well as ensuring any technical issues are resolved in a timely manner.

- Server Administration Apprentice

Here, you'll learn valuable skills while providing day-to-day support for our clients' servers and operating systems. With support from highly knowledgeable colleagues, you'll manage complex infrastructures while providing technical support and maintenance. It's a highly visible role, which will see you troubleshooting, streamlining and improving our capabilities by bringing new ideas to the table, right from the start.
